

## Key Partners

Key Performance has been in partnership with Florida Atlantic University since 2005. FAU currently has more than 26,000 students enrolled, and people from all 50 states and more than 130 countries study, live and/or work at FAU.

The mission of the FAU Barry Kaye College of Business is to be one of the nation's preeminent regional business schools by consistently creating and delivering the most relevant global business and economics higher education teaching, leadership, and research programs for the strategic industries in the South Florida service area. The College of Business is accredited by the Association to Advance Collegiate Schools of Business (AACSB) International, the premiere accrediting body in the world.

*“Overall I was very pleased with the Green Belt course. This course was quite effective in meeting my personal objectives, and has stimulated my interest in continuing to pursue my Black Belt certification. The value far exceeded the cost and I am eager to immediately apply much of what I have learned.”*

Rick Marcet  
August 2007

## Why Key Performance?

- » Key Performance's curriculum is aligned with the recommendations of both the American Society for Quality (ASQ) and iSixSigma and focuses on real world application
- » Key Performance's curriculum seamlessly integrates Six Sigma, Project Management, and Lean Enterprise improvement methodologies
- » Our instructors are PMP certified as well as Six Sigma Master Black Belt certified
- » Our programs are open-enrollment. You do not need to be employed in an organization that is currently involved with Six Sigma to become certified
- » Multiple learning delivery methods are utilized, such as: instructor-led classroom training, instructor-led online training, interactive classroom-based training

*“My experience with the Six Sigma Black Belt Certification course has been excellent. This course provided me with very clear and organized concepts that will contribute to my performance as a quality professional. The statistical, managerial, and improvement tools and techniques learned during this course make me feel much more confident in my abilities as a quality manager. I strongly recommend this course to every professional that wants to actively lead organization-wide improvement efforts.”*

Rafael De la Puente  
Quality Control Manager

## Six Sigma Training & Solutions

## What is Six Sigma?

Six Sigma is a disciplined, data driven approach and methodology that can be applied to any aspect of business. In many organizations it is a measure of quality used to improve customer satisfaction, increase efficiency, eliminate waste and increase profits.

## Why Six Sigma?

### Individuals

- » Career advancement
- » Personal growth
- » Increased self-esteem
- » Increased confidence
- » Increased level of job performance
- » Improved marketability

### Organizations

- » Create an improvement system with proven tools
- » Improve your most important asset: your employees
- » Achieve organizational excellence in business process improvement
- » Excellent ROI – 10 to one or greater
- » Complete projects that result in measurable bottom-line improvement

## Six Sigma Certifications

### Yellow Belt Certification:

12 hours/12 PDU's

Also offered  
**Online!**

The 2-day Yellow Belt course is designed to provide a basic understanding of the fundamentals of Six Sigma, its metrics, and basic improvement methodologies.

### Green Belt Certification:

35 hours/35 PDU's

Also offered  
**Online!**

Also offered  
**Online in Spanish!**

After successful completion of this program, participants will be able to form and facilitate Six Sigma teams, manage basic Six Sigma projects and implement tools, techniques and practices to achieve cost reductions and quality improvement within their organization.

### Black Belt Certification:

91 hours/91 PDU's

Also offered  
**Online!**

Upon completion, students will be equipped to manage advanced Six Sigma projects and to actively lead organization-wide improvement efforts. Black Belts will learn how to apply advanced tools and techniques to achieve cost reductions and quality improvements in their organization and be able to guide, mentor, and define projects for Green Belts.

### Master Black Belt Certification:

35 hours/35 PDU's

Also offered  
**Online!**

Students will be able to train, mentor and coach everyone in the organization who is involved in Six Sigma and raise the level of organizational competency with respect to Six Sigma. They will also be able to develop and conduct training sessions, transfer lessons learned and assist upper management to drive change by fostering an organizational culture of continuous improvement.

## Corporate Courses

The implementation of Six Sigma starts with top management. Management commitment is one of the most critical components for a successful Six Sigma implementation and will determine how to focus and deploy Six Sigma so that key business priorities

and strategy issues are addressed. It establishes the corporate-level goals and targets and determines how the Six Sigma initiative will initially be focused.

The following classes are available for onsite delivery to our corporate customers:

- » *Six Sigma Executive Coaching:* Designed as a one or two-day course aimed at executive level management to raise awareness of what Six Sigma is and why management is the key to a successful launch.
- » *Six Sigma Champion Training:* Two days of training on what Six Sigma is and the roles and responsibilities of a Champion. It will provide the champion with the knowledge of how their role supports the efforts of the Black Belt both logistically and organizationally.

## Corporate Solutions

Key Performance will help you determine if Six Sigma is right for your organization. Our consultants will conduct a quality assessment to validate where you are and what you need to do to prepare for a Six Sigma implementation.

In any implementation that involves change it is critical that senior management has a strategy to set direction. We will help you focus on what you need to do in order to achieve results. Our consultants will work with you to determine the right improvement priorities to optimize your investment. We will help you build a good communication plan to send the right messages to build support for your process improvement efforts.
